

Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) A method of making a hollow fiber membrane contactor comprising the steps of:

winding a hollow fiber fabric around a center tube,
first potting the fabric and the tube together,
forming thereby a unitized structure,
placing the structure into a shell,
second mold potting the structure and the shell together by
injecting a potting material into a space between the structure and
the shell, and

forming thereby a cartridge.

2. (Original) The method of claim 1 wherein the first-mentioned potting being bead potting.

3. (Cancelled)

4. (Original) The method of claim 1 further comprising the step of heat-treating the cartridge.

5. (Original) The method of claim 4 wherein the heat-treating further comprises a first heat-treating and a second heat-treating.

16. (Currently Amended) The method of claim 1 wherein potting further comprises the first or the second potting with a material selected from the group consisting of thermosetting materials and thermoplastic materials.

17. (Previously Added) The method of claim 16 wherein the thermosetting material being selected from the group consisting of epoxy and polyurethane.

18. (Previously Added) The method of claim 16 wherein the thermoplastic material being selected from the group consisting of polyolefins and polyurethanes.

19. (Previously Added) The method of claim 1 wherein placing the structure into a shell further comprises centering the structure in the shell.

20. (Previously Added) The method of claim 1 wherein potting the structure and the shell together further comprises injecting a potting material into a space between the structure and the shell.

21. (New) A method of making a hollow fiber membrane contactor comprising the steps of:

- winding a hollow fiber fabric around a center tube to a diameter of at least six inches,
- bead potting the fabric and the tube together,
- forming thereby a unitized structure,
- placing the structure into a shell,
- mold potting the structure and the shell together by injecting a potting material into a space between the structure and the shell, and
- forming thereby a cartridge.

22. (New) The method of claim 21 further comprising the step of heat-treating the cartridge.

23. (New) The method of claim 22 wherein the heat-treating further comprises a first heat-treating and a second heat-treating.

24. (New) The method of claim 21 wherein bead or mold potting further comprises using a material selected from the group consisting of thermosetting materials and thermoplastic materials.

25. (New) The method of claim 24 wherein the thermosetting material being selected from the group consisting of epoxy and polyurethane.

26. (New) The method of claim 24 wherein the thermoplastic material being selected from the group consisting of polyolefins and polyurethanes.

27. (New) The method of claim 21 wherein placing the structure into a shell further comprises centering the structure in the shell.

28. (New) The method of claim 21 wherein potting the structure and the shell together further comprises injecting a potting material into a space between the structure and the shell.
